

# Deliver

## System Requirements

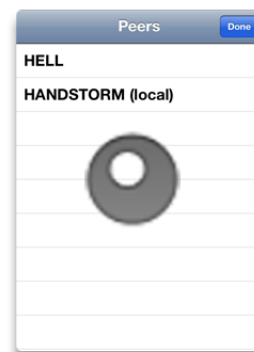

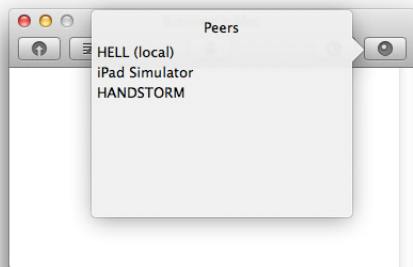

Mac running Mac OS X Lion 10.7 or higher

iPhone, iPod and iPad running iOS 5.0 or higher

## Connection

As long as your devices are in the same local network (LAN) then they work properly, you can find them in "Peers".

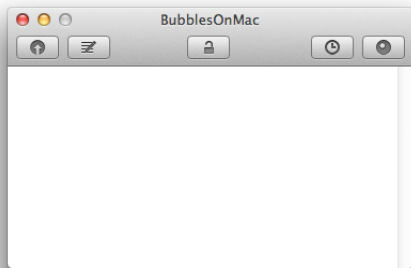

Devices connected to the same router is always ready to work.

# Deliver

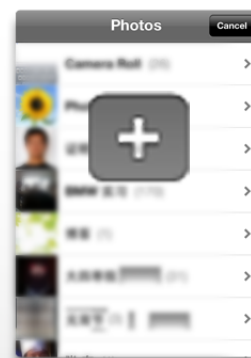

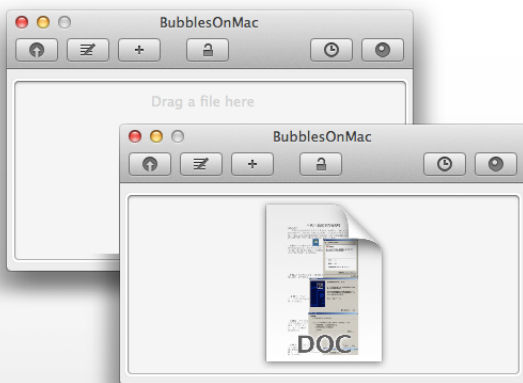

Devices connected with each other via Personal Hotspot will work, too.

## Features

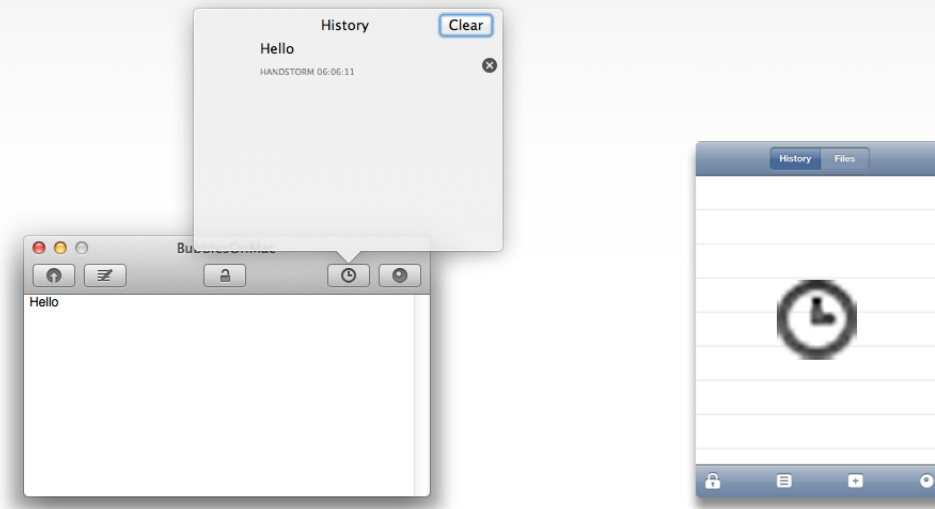

Sending text between your devices is extremely easy, you can then copy your text or send it via messages and emails.

Deliver can send any size of files from any sources to any devices in your "Peers" list, you can preview files and save received images to gallery.

# Deliver

History is shown newest on top, you can resend any message you used before or you can clear them. History is automatically cleared once app quit.

Every received file is stored in "Files" safely. You can use or delete them anytime you want.

You can hide you devices by using passwords, only devices using the same password can work with each other.

# Deliver

Enjoy your bubbles, we will bring Windows app, bluetooth supporting and even cooler features in the future!
