★★★★ 8 Ratings

Description

Deliver is a utility you really should install. With Deliver you can transfer and share your contents extremely easy between your iOS and Mac OS devices.

★ Deliver for iOS ★

Find "Bubbles the Deliver" in the iOS App Store:
http://itunes.apple.com/us/app/bubbles-the-deliver/id506646552?ls=1&mt=8

★ Features ★

• Share text between devices and use them for messages, emails and whatever you like
• Share files, preview them in Deliver and review them in Finder
• Lock your Deliver with password to hide it from the others, only devices using the same password can see each other
• Works in local networks, such as devices connected to same router, personal hotspot, Wi-Fi...

★ Examples of what Deliver can do... ★
• Type text on Mac and send message or email by iPhone
• Take a photo of your friend, send it to your own iPhone or iPad via personal hotspot connection, no need of MMS
• Transfer iPhone images wirelessly to Mac without iTunes
• Send any file between your devices without any file sharing protocol
• Chat with your classmates silently in a classroom
• Every way you create and like!

★ Requirements ★
iPhone, iPad and iPod touch running iOS 5.0 or higher
Mac OS X 10.7 or higher

Deliver Support ▶

What's New in Version 1.0.1

★ You can terminate a delivering task by click the close button besides the task in "History"
★ Alert messages for unsuccessful delivery
⬆ More stable and bug free

Customer Reviews

Needs Improvement ★★
by Comm2

It indicates either delivery is terminated by receiver or the network condition is bad. You may fix this problem by restarting Deliver. Updates must be made.
